WORK EXPERIENCE

Innovare

Senior Full-Stack Engineer

Sep. 2025 – Present

Remote

[Innovare](#) is a K–12 education analytics platform that converts multi-source student data into real-time dashboards, cohorts, and AI-driven recommendations to help educators identify risks early and drive targeted interventions.

- Built **AI-powered education analytics** dashboards serving cohort-driven insights at scale.
 - **Architected a microservices platform** using Express.js, PostgreSQL (pgvector for semantic search), Redis/BullMQ, and Docker, powering React dashboards.
 - Designed **BigQuery data pipelines** (Bronze / Silver / Gold) with ingestion from Google Sheets and Flatfile, including OAuth token management, sync orchestration, and CSV validation.
 - Developed high-performance **React frontends for large datasets** with custom tables, charts, and SSE-based real-time cohort alerts.
 - **Integrated Vertex AI** (text-embedding-005) to enable semantic search and LLM-driven features (cohort creation, thresholds, interventions).
 - Improved reliability with Auth0, Sentry monitoring, frontend validation, dashboard self-healing logic, and **Jest/Supertest testing**, preventing data inconsistencies and infinite loading states.
 - Built and deployed **FastAPI-based AI microservices**, enabling scalable LLM-driven workflows and improving backend performance.
 - Architected an **MCP server for multimodal data extraction** (PDFs, images), transforming unstructured inputs into structured datasets for downstream analytics and AI agents.
 - Designed and operationalized a **Medallion data architecture** (Bronze / Silver / Gold) in BigQuery, standardizing ingestion, enforcing data quality, and enabling analytics at scale.
 - **Led the transition to a modular microservices architecture**, reducing system coupling and enabling independent scaling and deployment of services.
 - Designed and orchestrated **AI agents systems**, including training pipelines, task routing, and integration with enterprise data platforms.
- **Stack:** React (JavaScript), Express.js, Python (FastAPI), GCP, BigQuery, PostgreSQL, pgvector, Redis, BullMQ, Vertex AI, Auth0, Sentry, Docker

Glampi

Lead Technical Engineer Consultant

Feb. 2025 – Aug. 2025

Remote

[Glampi](#) is a SaaS platform for managing bookings and operations of glamping experiences, focused on delivering seamless digital infrastructure for hospitality providers.

- Led the **architecture and development of a scalable microservices** platform using NestJS, Next.js, PostgreSQL, and Prisma, enhancing system modularity and maintainability.
- Implemented **robust CI/CD pipelines** using Docker and AWS CodePipeline, enabling zero-downtime deployments and faster release cycles.
- **Integrated third-party services** including payment gateways, analytics, and communication APIs, improving customer checkout flow and operational efficiency.
- Designed and enforced **secure user authentication and authorization flows** with AWS Cognito, supporting multiple user roles and account types.
- Collaborated closely with product and design teams to define technical strategy and deliver user-facing features that **improved customer onboarding and booking experience by 40%**.

- **AI Systems (Practical Applications):** Designed and implemented an AI-powered search tool for Glampi, a platform for glamping businesses. The tool uses OpenAI's language models to interpret natural language queries and retrieve structured booking, availability, and customer data, streamlining business operations and improving user experience.
 - **Stack:** NestJS, Next.js, Prisma, PostgreSQL, Docker, AWS (ECS, RDS, Cognito), Stripe, REST APIs, CI/CD

Avattar Consulting

Senior Frontend Developer Consultant

Nov. 2023 – Aug. 2025

Remote

[Avattar.com](https://avattar.com) is an Experienced IT Partner Empowering DevOps, Security, ITOM and Analytics.

- Led the development of the **frontend of the ASIA platform (Avattar Smart Intelligent Assistant)**, streamlining test plan creation, user story generation, and automation of software quality certification processes using **generative AI**, reducing manual effort by **50%**.
- Evaluated **10+ software development projects** and proposals, estimating development efforts and defining scope, complexity, and resource allocation, optimizing project delivery timelines by **30%**.
- Implemented automated testing strategies that improved software reliability, leading to a **40% reduction in post-release defects** and **20% faster deployment cycles**.
- Conducted **functional testing for web and mobile applications**, ensuring software met **100% compliance** with industry standards and security best practices.
- **AI & LLMs:** Integrated and led the implementation of generative AI solutions using **OpenAI** and **Gemini** APIs in production for the ASIA platform at Avattar Consulting, streamlining test plan creation and user story generation. This reduced manual QA efforts by 50%, demonstrating practical application beyond basic integrations.
 - **Stack:** JavaScript (React) | Java (Spring Boot) | SSO (Google and Azure) | OpenAI | Gemini | Postgres | Amazon web services | Cypress | React Testing Library.

BRAVE UP!

Co Founder & Founding Engineer

Jul. 2016 – Feb. 2025

New York, NY

BRAVE UP! assists K-12 schools in identifying, predicting, and preventing microaggressions, bullying, and cyberbullying incidents, impacting **over 500 schools** and **100,000+ students** across different regions.

- Managed **4 cross-functional teams** (Frontend, Backend, DevOps, Technical Support) using agile methodologies, improving development efficiency by **30%** and reducing deployment time from **weekly to daily releases**.
- Ensured adherence to best programming practices, leading to a **40% reduction** in bug reports and improving system performance by **25%**.
- Developed key features for the BRAVE UP! school platform and back-office administrator for the operations team, coding both frontend and backend components that increased platform adoption by **60%**.
- Enhanced user experience by implementing new features, leading to a **35% increase in user engagement** and a **20% improvement in retention rates**.
- **Python (Production Experience):** Built and maintained Python microservices for data analysis at BRAVE UP!, leveraging AWS Lambda for serverless execution. These services process event-driven behavioral data pipelines, enabling real-time incident detection and analytics across K-12 school platforms.
 - **Stack:** *Frontend:* React, Sass, Ant Design, D3, Vite, I18n | *Testing:* React Testing Library, Cypress, Vitest.
Backend: Node.js, Express.js, AdminJS, Strapi V3, Python | *Integrations:* Mixpanel, Sentry, Intercom, AWS, Firebase

Qualitas Life Foundation*Administrator Finance Officer***Jun. 2017 – Nov. 2019***New York, NY*

[Qualitas of Life Foundation](#) is a nonprofit providing basic financial education to Hispanic families in New York to enhance their financial security and quality of life.

Socialab*Chief Financial Officer***Oct. 2012 – Jun. 2016***Santiago, Chile*

[Socialab](#) is a social incubator funded by IDB Bank, supporting early-stage innovative and sustainable social enterprises to drive global impact.

Ril-Light*Engineer***May 2010 – Jul. 2012***Santiago, Chile*

[Ril-Light](#) is a company specializing in industrial liquid waste treatment.

EDUCATION

New York University*Master of Science in Management and Systems***May 2019***New York, NY***Universidad Mayor***Bachelor in Engineer, Industrial Engineer***Dec. 2009***Santiago, Chile***SKILLS**

Core competences: Computer Science | JavaScript | React | React Native | nodeJS | ExpressJS | Entrepreneur

Languages: Spanish | English
